Subject: Correction to Deadline for next TSHA and Dive Safety Plan

Hi Davis.

I looked at the Pre-RD Group's schedule again and I need to correct what I said about the timing of the TSHA and Dive Safety Plan for Surface Water Sampling and Sediment Trap Deployment

Looks like they plan to start surface water sampling on Monday 3/26 and Diving activities for Sed. Trap Deployment the following Monday on April 2

This means their TSHA and Dive Safety Plans would be due to EPA no later than next Monday 3/19, not yesterday and today as I noted in my email below.

Scott

No worries. They would like to talk about following in the near future:

QAPP ON 3/15 (scheduled) **Yes, we're ready.**

Fish Tracking 3/15 (maybe the same call with the QAPP) **Review is done, I will send you those. We should be ready to discuss them, but I think Karl G. should also attend this call if possible – may need to postpone to a date that works for him.**

Porewater on 3/15 @ 3pm or 3/16 @1pm Let me know which time works best for you **Either one should work, but I think we would be better off doing this on 3/16 at 1pm**

Surface sediment on 3/19 or 3/20 **Let's shoot for 3/20**

Coring and fish tissue (in person, wk of 3/23) **I don't believe we've seen RTCs for these two tasks. Also – 3/23 is a Friday. Most weeks start Monday, which would be week of 3/19 If they want to meet about these RTS on the week of 3/19 to 3/23, we should get RTCs no later than today.**

One other reminder for them: Not sure if their schedule for Surface Water/Sediment Trap Sampling is still starting on 3/21 for surface water sampling and 3/28 for sed trap installation, but if it is, they need to provide a TSHA and a Dive Specific HASP for these events no later than tomorrow – 3/14

Let me know of your availabilities

Thanks,

Davis Zhen

Yes and we are close to completing our review of their RTCs on the Porewater FSP. Should be done today and I haven't looked them over, but we may be able to discuss those Thursday along with the QAPP RTCs. I'll let you know tomorrow.

Scott,

I probably missed your email on this, have we reviewed the Porewater FSP from AECOM yet?

Thanks,
